

December 2017

Challenging Regulatory deadlines in 2018 ahead of us Adjustment of our Service Fees as of 1st of January 2018

Dear Madam, Dear Sir,

We at Chemservice are proud to serve our customers worldwide with high quality consultancy on Regulatory Affairs and Chemical Control Legislation for more than ten years now. Our customers' requirements and tasks have been increasing over the last ten years due to the rise of chemical regulations around the world. Your trust in us has enabled us to become one of the leading consulting firms to the chemical industry and its value chains. It is our ambition and motivation to satisfy our customers' needs in the best way possible.

In anticipation of a very demanding year ahead of us with the last EU-REACH registration deadline in May, please kindly make sure to communicate your regulatory requirements to us well ahead of the deadline. Together we may need to schedule and prioritize your tasks to be able to complete the work within the given timeline and allocate non-REACH related tasks appropriately (e.g. Korean-REACH).

In order to allow capacity increases, continuous expert trainings and business investments to secure our high level of quality in the future, please be informed that as of 1st of January 2018 our hourly rates will be adapted for new projects or as contracts allow.

For further information, please do not hesitate to contact us.

We appreciate your business and look forward to a prosperous year 2018. Thank you for our cooperation in 2017.

With best regards,

Dr. Dieter Drohmann
Managing Director
