

December 2017

CHEMSERVICE Global Regulatory Overview - Update December 2017

Dear Customer,

More and more countries around the world feel the demand to introduce chemical regulations or to reform their existing ones. Many of the latest chemical regulations cover a range of the requirements set out in REACH, e.g. the obligation to register and document chemical substances.

We at Chemservice keep track of the developments and introduced our first Global Regulatory Overview in 2013, summarizing the latest trends in all important countries as well as monitoring upcoming new frameworks. Since its first issue, this compilation has been on high demand and our work was much appreciated.

Today, we are happy to introduce to you our **Global Regulatory Overview - Update December 2017**. As usual, it contains information on Chemical Control Legislation & Existing Chemical Inventories, Food contact Legislation & Requirements, Cosmetic Legislation & Requirements, GHS Implementation and Product Registrations followed by country specific regulations. Please see the table of contents attached to this letter.

In case you are not yet a subscriber, you can purchase the full report for 500 EUR. Annual updates are made available for 250 EUR.

We are excited to share this valuable overview with you, giving you a better understanding of your international business and enable you to be well prepared for the future. Don't miss it.

Please contact us at contact@chemservice-group.com or call us at +49 6241 954800.

With best regards,

Dr. Dieter Drohmann
Managing Director
