

CHEMSERVICE is a leading global consultancy to the chemical industry and its value chain with offices in Europe, South Korea and USA. For more than 13 years, we support our clients in the review, implementation and observation of national and international chemical regulations as an independent service provider. We use our scientific, technical and strategic know-how to overcome regulatory barriers globally, giving our clients a competitive edge.

We are growing and seek to expand our EU advocacy & risk assessment teams with a motivated

Junior Socio-Economic Analyst

Your tasks:

- Develop socio-economic evaluations of chemicals and their uses in the EU market, in the context of REACH (authorisation and restriction), BPR, or similar legislation
- Perform market and trend analysis for specific chemicals in the EU and worldwide
- Support Regulatory Management Option Analysis (RMOA) activities
- Evaluate potential economic impact of substitution of chemicals by possible alternatives
- Self dependent project management

Your profile:

You have an appropriate university degree or postgraduate qualification in economics, engineering, business management, or related fields and you are willing to enter into new challenging fields of activity. You are skilled in lateral and interdisciplinary thinking and are willing to apply your theoretical knowledge in everyday business. You are a team player and are able to work successfully in small groups or self-dependent. We request as well strong analytical skills and very good communication and presentation skills in English and an additional EU language.

We offer:

- A motivated team with a high level of expertise who will give you all the support to get you up and running
- Interesting and self dependent tasks in an international business environment
- A full-time, permanent contract with flexible working time, additional professional training and personal development

Preferably, your place of work will be situated in our office in Castellón, Spain, or alternatively in one of our other EU based offices (Mertert, Luxembourg, or Worms, Germany).

Interested?

We are looking forward to your application!
